Profile

Beyond my master's degree in applied statistics and my experience at EDF, which form the foundation of my professional background, I like to think of the role of a data scientist as that of a detective — not to find a culprit, but to identify what can optimize a business.

At EDF, I demonstrated my ability to work independently and take the initiative, while learning to apply my theoretical knowledge as a statistician in a business context

Education

- 2022 – 2024 **Master's Degree in Mathematics and Statistical Learning**,
Paris-Saclay University, Versailles, France
- 2021 – 2022 **Bachelor's degree in Mathematics**,
UVSQ, Versailles, France
- 2014 – 2017 **Higher school preparatory classes in Mathematics and Physics**,
A. Schweitzer High school, Le Raincy, France

Skills

- **Computer related skills:** Python [proficient], R (RStudio) [familiar with], Microsoft Office/Google Workspace
- **Data Processing and Analysis** (preparing data for analysis, PCA, etc.)
- **Deep Learning** (PyTorch)
- **Theoretical and applied statistics** (Inferential statistics, Statistical hypothesis tests, Nonparametric statistics, Bayesian statistics, Computational statistics, Machine learning, Extreme value theory)
- **Forecasting techniques** (Time series, ARMA, etc.)
- **Stochastic processes** (Markov chains, etc.)
- **Numerical optimization**

Experience

- 04/2023 – 08/2023 **EDF (Électricité de France)**, *Internships*, Data Scientist,
and Gas division of the Business Market Sales Department
- 03/2024 – 08/2024
 - Performed business data analysis using Pandas;
 - Developed a decision-support tool that identifies key trends from datasets, enabling data-driven understanding of clients' gas consumption;
 - Coded an error resolution tool with Python;
 - Presentations and reports.
